EXECUTIVE SUMMARY

Computer Science and Engineering undergraduate with practical experience in AI/ML and Agentic AI systems through internships and freelance projects. Proficient in Python, Machine Learning, AI agent testing, debugging, and quality assurance. Strong analytical and problem-solving skills with a passion for developing intelligent and reliable software solutions.

EDUCATION

KLS Gogte Institute of Technology

Belagavi, India

2022-2026

- B.E in Computer Science and Engineering. CGPA: 7.9

Expert Pre-University College

Mangaluru, India

2022

- Secured 79.5 % in 12th grade

Nehru International Public School

Guledgudd, India

2020

- Secured 67.4 % in 10th grade

EXPERIENCE

Freelancer - Agentic AI Partner | CVClap

April 2026 - Present

OpenClaw Agent Design & Deploy – Email Writing Bot & CV Formatting Bot

- Developed an **Email Writing Bot** capable of generating professional and context-aware emails relacing automated/manual cold email process for the CVClap recruitment agency.
- Enhanced a **CV Formatting Bot** to automatically structure and format resume content into a professional and ATS-friendly layout as per customer templates.
- Designed agent workflows for task automation, content generation, and user interaction.
- Integrated Local LLM (Qwen 1B+) model for context extraction, translating the total token cost to immediate 0, saving clients 50-100USD per day.
- Applied prompt engineering techniques to improve response quality, accuracy, and usability.
- Tested and refined agent behaviour to ensure reliable and consistent outputs.

OpenClaw Agent Testing

- Active participation of testing of already existing agents (**CV matching agent, Client hunter agent, JD searching agents.** etc)
- Tested AI agents to evaluate functionality, accuracy, and overall performance.
- Identified, analyzed, and fixed bugs affecting agent behaviour and workflow execution.
- Performed quality assurance testing to validate agent responses and task completion.
- Maintained issue logs and documented bug fixes for tracking and verification purposes.
- Prepared and submitted daily reports summarizing testing activities, identified issues, and resolved bugs.
- Monitored agent performance and implemented improvements to enhance reliability and user experience.

INTERN - AIML With Cloud | SuprMentr Technologies Pvt Ltd, Bengaluru

Feb 2026 - May 2026

- Completed a 15-week internship focused on Artificial Intelligence, Machine Learning, and Cloud Computing.
- Learned and implemented core Machine Learning concepts including data preprocessing, train-test split, model training, regression, and classification algorithms.
- Worked with supervised learning techniques and model evaluation methods for predictive analysis.
- Gained hands-on experience in building and testing ML models using Python-based workflows.
- Developed a capstone project titled **“Real-Time Emotion Detection (Video)”** using AI and Computer Vision concepts.

PROJECTS

Hand Gesture Recognition Using ML

Dec 2025 | Python, OpenCV, MediaPipe, Machine Learning

- Built a real-time sign language detection system using OpenCV for image processing and MediaPipe for hand landmark tracking.
- Implemented machine learning models to classify gestures into corresponding sign language alphabets/words.
- Designed a responsive pipeline for gesture recognition and real-time prediction with high accuracy.
- Integrated video input streams and optimized performance for low-latency detection.
- Demonstrated expertise in computer vision, feature extraction, and ML model deployment.

Real-Time Emotion Detection System

May 2026 | Python, OpenCV, HS Emotion, Computer Vision, Deep Learning

- Developed a real-time facial emotion detection system using OpenCV and HS Emotion Recognizer for AI-based emotion classification.
- Implemented face detection using Haar Cascade Classifier and integrated webcam-based live video processing.
- Built a real-time prediction pipeline to detect emotions such as Happy, Sad, Angry, Neutral, Fear, and Surprise.
- Optimized frame processing and detection workflow for smooth low-latency real-time performance.
- Demonstrated practical skills in computer vision, facial expression analysis, deep learning integration, and AI application development.

SKILLS

- **Programming Languages:** C, Python, HTML/CSS
- **Tools:** OpenClaw, Power BI, VS Code
- **Frameworks:** Figma, React JS

CERTIFICATION

- Claude With Anthropic API
- NPTEL Certification on Cloud Computing.
